The September 2015 samples (I mislabeled as August) had some as co-located and some as independent (below water table).

See corrections below.

Bob,

Which ones were splits samples of soil borings that WDNR/REI samples?

Could you add that? Also, would it be best for you to share it with Chris so that he could add the

WDNR/REI data? Once we do that, I think we could send it to the tribe.

Sherry,

Here is a list of samples collected by EPA or for EPA at the Tower Standard site:

Private Well Samples- 9 locations, 14 total samples collected in November 2014 and September 2015.

Soil Boring Samples- 17 samples collected in September 2015. Some co-located with REI sample depths, some independent samples.

10 samples collected in April 2016.

Groundwater Sampling- 4 samples collected in April 2016.

6 samples collected in August 2016.

Air/Vapor Samples- 1 indoor air, 1 outdoor air and 1 sub-slab sample collected in April 2016.
